Artist statement

My practice exists between art and science, structure and intuition. Rather than choosing one path, I combine analytical observation with expressive painting. As a scientist, I recognize patterns and connections; as an artist, I translate them into watercolor, oil, and pastel works that capture movement, fleeting moments, and emotional atmosphere. Through my project “Sustainable Art from Scientific Waste,” I merge scientific knowledge and artistic practice to create environmentally conscious work that connects both fields and their communities.

Sustainable art

Title: 'Waiting for the wave'

Year: 2025

Medium: Acrylic on
primed poster paper

Size: AO (84.1 cm x 118.9
cm)

Sustainable art
